proposed licensing action. Provided that the field test data support the conclusions of the original EA and the issuance of a FONSI, APHIS does not intend to issue a separate EA and FONSI to support the issuance of the associated product license, and would determine that an environmental impact statement need not be prepared. APHIS intends to issue a veterinary biological product license for this vaccine following satisfactory completion of the field test provided no adverse impacts on the human environment are identified and provided the product meets all other requirements for licensing.

Authority: 21 U.S.C. 151–159.

Done in Washington, DC, this 3rd day of October 2018.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

[Docket No. APHIS–2018–0033]

Oral Rabies Vaccine Trial; Availability of a Supplement to an Environmental Assessment and Finding of No Significant Impact

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service has prepared a supplement to an environmental assessment and finding of no significant impact relative to an oral rabies vaccination field trial in New Hampshire, New York, Ohio, Vermont, and West Virginia. Based on its finding of no significant impact, the Animal and Plant Health Inspection Service has determined that an environmental impact statement need not be prepared.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Chipman, Rabies Program Coordinator, Wildlife Services, APHIS, 59 Chennell Drive, Suite 7, Concord, NH 03301; (603) 223–9623. To obtain copies of the supplement to the environmental assessment and the finding of no significant impact, contact Ms. Beth Kabert, Environmental Coordinator, Wildlife Services, 140–C Locust Grove Road, Pittstown, NJ 08867; (908) 735–5654, fax (908) 735–0821, email: *beth.e.kabert@aphis.usda.gov.*

SUPPLEMENTARY INFORMATION: The Wildlife Services (WS) program in the Animal and Plant Health Inspection Service (APHIS) cooperates with Federal agencies, State and local governments, and private individuals to research and implement the best methods of managing conflicts between wildlife and human health and safety, agriculture, property, and natural resources. Wildlife-borne diseases that can affect domestic animals and humans are among the types of conflicts that APHIS–WS addresses. Wildlife is the dominant reservoir of rabies in the United States.

On July 3, 2018, we published in the **Federal Register** (83 FR 31117–31118, Docket No. APHIS–2018–0033) a notice [1] in which we announced the availability, for public review and comment, of a supplement to an environmental assessment (EA) that examined the potential environmental impacts associated with the proposed field trial to test the safety and efficacy of an experimental oral rabies vaccine (ORV) for wildlife in New Hampshire, New York, Ohio, Vermont, and West Virginia. In addition, the supplement analyzed the potential impacts of expanding the geographic range of the field trial zone to two additional counties in Ohio and four additional counties in West Virginia.

We solicited comments on the EA for 30 days ending August 2, 2018. We did not receive any comments.

In this document, we are advising the public of our finding of no significant impact (FONSI) relative to the ORV field trial in New Hampshire, New York, Ohio, Vermont, and West Virginia. The finding, which is based on the EA and the 2013, 2015, and 2017 supplements to the EA, reflects our determination that the distribution of this experimental wildlife rabies vaccine will not have a significant impact on the quality of the human environment.

The 2018 supplement to the EA and the FONSI may be viewed on the APHIS website at *http://www.aphis.usda.gov/wildlifedamage/nepa* and on the *Regulations.gov* website (see footnote 1). Copies of the 2018 supplement to the EA and the FONSI are also available for public inspection at USDA, Room 1141, South Building, 14th Street and Independence Avenue SW, Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect copies are requested to call ahead on (202) 799–7039 to facilitate entry into the reading room. In addition, copies may be obtained as described under **FOR FURTHER INFORMATION CONTACT**.

The 2018 supplement to the EA and the FONSI have been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*); (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508); (3) USDA regulations implementing NEPA (7 CFR part 1b); and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

Done in Washington, DC, this 3rd day of October 2018.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF COMMERCE

Economic Development Administration

Notice of Petitions by Firms for Determination of Eligibility To Apply for Trade Adjustment Assistance

AGENCY: Economic Development Administration, U.S. Department of Commerce.

ACTION: Notice and opportunity for public comment.

SUMMARY: The Economic Development Administration (EDA) has received petitions for certification of eligibility to apply for Trade Adjustment Assistance from the firms listed below. Accordingly, EDA has initiated investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each of the firms contributed importantly to the total or partial separation of the firms' workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.
